

# ZeroEmit

## Energy reduction at Telco operators

- Reduce greenhouse and carbon emissions
- Guaranteed renewable energy by telecom towers, any time, anywhere
- Decrease operational costs
- Trust between electricity (network) and telecom providers
- Energy networks need flexibility, scalability and simpler administration

## Zero fossil energy platform

- Platform of renewable energy
- Information nodes (Big Data, SCADA, blockchain, controllers, ...)
- Collaborative Energy & Communication management
- Utilities billing

## Patent awarded

- Spanish patent P201630029
- Expires 15/1/2036

## Interested parties

- Telecom infrastructure operators
- Electronic device manufacturers
